Belgian Meldorfer© assortment

THE POWER OF SURFACE.

BELGIAN STANDARD MELDORFER® ASSORTMENT

At its location in Schleswig-Holstein, far in the north of Germany, The Meldorfer® factory has been producing high-quality flat facing bricks using traditional artisan methods for around 40 years now. The Meldorfer® mineral flat facing bricks differ from traditional brick strips in more ways than one. They are 5 times thinner than a traditional brick strip, making them very light and easy to transport. Thanks to their unique manufacturing process, which involves hardly any machines, all Meldorfer® flat facing bricks are almost 100% CO2-neutral.

Now get ready to discover the new Belgian standard assortment, consisting of 24 different new designs based on the best Belgium has to offer.
